Título: Advances in immunology. Vol. 39 [electronic resource] edited by Frank J. Dixon ; associate editors, K. Frank Austen, Leroy E. Hood, Jonathan W. Uhr

Editorial: Orlando Academic Press 1986

Descripción física: 1 online resource (351 p.)

Mención de serie: Advances in immunology

Nota general: Description based upon print version of record

Bibliografía: Includes bibliographical references and index

Contenido: Front Cover; Advances in Immunology, Volume 39; Copyright Page; Contents; Chapter 1. Immunological Regulation of Hematopoietic/Lymphoid Stem Cell Differentiation by Interleukin 3; I. Introduction; II. Biochemical Properties of T Cell-Derived Lymphokines; III. Cellular Sources of Interleukin 3; IV. Regulation of the Production of Interleukin 3; V. Multiple Biological Activities Associated with Interleukin 3; VI. Regulation of Hematopoietic/Lymphoid Stem Cell Differentiation; VII. Potential Mechanisms for Interleukin 3 Regulation in Vivo VIII. Interleukin 3-Responsive Cell Lines: Origins and Properties IX. Mechanisms in Interleukin 3-Regulated Growth; X. Summary and Conclusions; References; Chapter 2. Antigen Presentation by B Cells and Its Significance in T-B Interactions; I. Introduction; II. The Capacity of B Cells to Serve as Antigen-Presenting Cells; III. The Fate of Antigen Taken up by B Cells; IV. The Effect of B Cell Activation on APC Function; V. The Capacity of B Cells to Function as Stimulator Cells in Mixed Lymphocyte Proliferative Responses VI. Differences in the Accessory Cell Function of B Cells Compared to Other Cell Types VII. Concluding Remarks; References;

Chapter 3. Ligand-Receptor Dynamics and Signal Amplification in the Neutrophil; I. Introduction; II. Ligand-Receptor Dynamics; III. Coupling Mechanisms; IV. Signals; V. Implications; References; Chapter 4. Arachidonic Acid Metabolism by the 5-Lipoxygenase Pathway, and the Effects of Alternative Dietary Fatty Acids; I. Introduction; II. Biosynthesis and Metabolic Inactivation of Arachidonic Acid-Derived Mediators III. Specific Enzymes in Leukotriene Biosynthesis and Processing IV. Cellular Specificity of Leukotriene Generation in Response to the Calcium Ionophore and Transmembrane Stimuli; V. Biologic Effects of the Leukotrienes; VI. Receptor-Dependent Mediation of Leukotriene Effects; VII. Modulation of Arachidonic Acid Metabolism by the Introduction of Dietary Alternative Fatty Acids; VIII. Biologic Properties of EPA and DCHA-Derived 5-Lipoxygenase Metabolites; IX. Effects of EPA and DCHA in Animal Studies; X. Effects of EPA and DCHA in Human Studies; XI. Conclusions; References Chapter 5. The Eosinophilic Leukocyte: Structure and Function I. Introduction; II. Anatomical Characteristics; III. Eosinophil-Associated Substances; IV. Light Density Eosinophils; V. Eosinophil Degranulation; VI. Phagocytosis by Eosinophils; VII. Eosinophils as an Effector Cell Damaging Parasites; VIII. Eosinophils and Hypersensitivity Reactions; IX. Eosinophils and Reproduction; X. Summary and Conclusions; References; Chapter 6. Idiotypic Interactions in the Treatment of Human Diseases; I. Introduction; II. The Idiotype Network; III. T Cells Involved in Idiotype-Determined Regulation IV. Regulation of the Normal Human Immune Response by Idiotypic Interactions

Lengua: English

ISBN: 1-281-46938-6 9786611469382 0-08-057815-2

Materia: Immunology

Autores: Dixon, Frank J. (Frank James) (1920-2008.) Austen, K. Frank (Karl Frank) Hood, Leroy E. Uhr, Jonathan W.

Enlace a serie principal: Advances in immunology (CKB)954926956855 (DLC)2005215189 (OCoLC)60626719 1557-8445

Enlace a formato físico adicional: 0-12-022439-9

Punto acceso adicional serie-Título: Advances in immunology
