Título: Advances in immunology. Vol. 61 [electronic resource] edited by Frank J. Dixon ; associate editors, Frederick Alt ... [et al.].

Editorial: San Diego Academic Press c1996

Descripción física: 1 online resource (429 p.)

Mención de serie: Advances in immunology 0065-2776

Nota general: Description based upon print version of record

Bibliografía: Includes bibliographical references and index

Contenido: Front Cover; Advances in Immunology, Volume 61; Copyright Page; Contents; Contributors; Chapter 1. CD40-CD40 Ligand: A Multifunctional Receptor-Ligand Pair; I. Introduction; II. CD40 as a Member of the TNF Receptor Superfamily; III. CD40-L as a Member of the TNF Superfamily; IV. Signal Transduction through CD40; V. Functional Consequences of in Vitro CD40 Engagement; VI. In Vivo Role of CD40-CD40-L Interactions; VII. Role of CD40-CD40-L in B Cell Immunopoiesis: A Synthesis; VIII. Perspectives; References; Chapter 2. Antibody Class Switching I. Introduction: Overview and Functions of Different Classes of AntibodiesII. Heavy Chain Isotype Expression during B Cell Differentiation; III. Regulation of Isotype Specificity during Antigen-Dependent Class Switching and Induction of Class Switch Recombination; IV. Mechanism of Switch Recombination; References; Chapter 3. Interleukin-2 Receptor Signaling Mechanisms; I. Introduction; II. IL-2R Structure:

Composition of the IL-2R; III. IL-2R-Triggered Proximal Signaling Events; IV. The Ras/MAP Kinase Cascade; V. The PI3-K Pathway; VI. IL-2R Signaling: Jaks and Stats VII. IL-2-Dependent G1-Phase ProgressionVIII. Characterization of the Target Protein of the FKBP12-Rapamycin Complex; IX. Summary and Perspective; References; Chapter 4. Control of the Complement System; I. Overview of Complement Regulation; II. Control of the Initiation Step of the Classical Pathway; III. Control of C3/C5 Convertases on Host Cells; IV. Control of Fluid-Phase C3/C5 Convertases; V. Control of Fluid-Phase MAC; VI. Control of Deposited MAC; VII. Control of Anaphylatoxins; VIII. Summary and Conclusions; References; Chapter 5. V(D)J Recombination Pathology; I. Introduction II. V(D)J RecombinationIII. Components of the V(D)J Recombination Machinery; IV. V(D)J Recombination Defects in Humans; V. Conclusion; References; Chapter 6. Major Histocompatibility Complex Class II Deficiency: A Disease of Gene Regulation; I. Introduction; II. Regulation of MHC Class II Gene Expression; III. Biochemical and Genetic Heterogeneity in BLS; IV. CIITA, the Gene Mutated in Complementation Group A; V. RFX5, the Gene Mutated in Complementation Group C; VI. Function of CIITA; VII. Function of RFX; VIII. Conclusions, Unresolved Questions, and Perspectives; References Chapter 7. TH1-TH2 Cells in Allergic Responses: At the Limits of a ConceptI. Introduction; II. The Regulation of Human IgE Synthesis; III. The Regulatory Potential of T Cells; IV. Mast Cells any Basophil Granulocytes: Innate TH2 Type Cells?; V. APCS and the Antigen Play a Decisive Role for the Onset of a Particular TH Response; VI. The Integrative Role of the Nervous System; VII. Psychological Factors and Allergic Diseases; VIII. Neuroendocrine Factors and IgE Regulation; IX. Concluding Remarks; References; Index; Contents of Recent Volumes

Lengua: English

ISBN: 1-281-98193-1 9786611981938 0-08-057837-3

Materia: Immunology Allergy

Autores: Dixon, Frank J. (Frank James) (1920-2008.) Alt, Frederick W.

Enlace a serie principal: Advances in immunology (CKB)954926956855 (DLC)2005215189 (OCoLC)60626719 1557-8445

Enlace a formato físico adicional: 0-12-022461-5

Punto acceso adicional serie-Título: Advances in immunology
