**Título:** Anatomy of descending pathways to the spinal cord electronic resource] edited by H.G.J.M. Kuypers and G. F. Martin

**Editorial:** Amsterdam New York Elsevier Biomedical Press New York Sole distributors from [sic] the U.S.A. and Canada, Elsevier Science Pub. Co. 1982

**Descripción física:** 1 online resource (423 p.)

**Mención de serie:** Progress in brain research v. 57

**Nota general:** Description based upon print version of record

**Bibliografía:** Includes bibliographies and index

**Contenido:** Front Cover; Anatomy of Descending Pathways to the Spinal Cord; Copyright Page; Contents; List of contributors; Preface; Chapter 1. Reticulospinal and vestibulospinal neurons in the young larva of a teleost fish, *Brachydanio rerio*; Chapter 2. Organization of descending pathways to the spinal cord in amphibians and reptiles; Chapter 3. Funicular trajectories of descending brain stem pathways in a lizard (*varanus exanthematicus*); Chapter 4. Avian bulbospinal pathways : anterograde and retrograde studies of cells of origin, funicular trajectories and laminar terminations Chapter 5. Reticular and raphe projections to the spinal cord of the North American opossum. Evidence for connectional heterogeneityChapter 6. The development of descending spinal connections. Studies using the North American opossum; Chapter 7. The anatomy of brain stem pathways to the spinal cord in cat. A labeled amino acid tracing study; Chapter 8. Brain stem projections to spinal Mniotoneuronal cell groups in rat studied by means of electron microscopy autoradiography Chapter 9. Differences in collateralization of the descending spinal pathways from red nucleus and other brain stem cell groups in cat and monkeyChapter 10. Descending noradrenergic projections and their spinal terminations; Chapter 11. Organization of descending serotonergic projections to the spinal cord; Chapter 12. Descending pathways to the sympathetic preganglionic

neurons; Chapter 13. The organization of the direct cerebellospinal projections Chapter 14. Tectal control of spinal cord activity : neuroanatomical demonstration of pathways connecting the superior colliculus with the cervical spinal cord greyChapter 15. The origin, course and terminations of corticospinal fibers in various mammals; Chapter 16. Growth and maturation of the rat corticospinal tract; Chapter 17. A new look at the organization of the motor system; Subject Index

**Lengua:** English

**ISBN:** 1-281-75634-2 9786611756345 0-08-086182-2

**Materia:** Brain stem- Anatomy Spinal cord- Anatomy Efferent pathways- Anatomy

**Autores:** Kuypers, H. G. J. M. Martin, G. F.

**Enlace a serie principal:** Progress in brain research (CKB)954926958899 (DLC)2011233390 (OCOlc)61848547  
1875-7855

**Enlace a formato físico adicional:** 0-444-80413-7

**Punto acceso adicional serie-Título:** Progress in brain research v. 57
