Monografía

The many recent advances in the treatment of spasticity have created a need for an up-to-date volume devoted entirely to today's optimal treatment strategies for this difficult medical problem. In *Clinical Evaluation and Management of Spasticity*, David A. Gelber, MD, and Douglas R. Jeffery, MD, have addressed this need by assembling a comprehensive collection of articles surveying the pathophysiology of chronic neurologic spasticity and detailing its often complex medical and surgical management. Written by leading experts in neurology and rehabilitation, the book covers physical and occupational therapy, splinting and orthotics, electrical stimulation, orthopedic interventions, nerve blocks, the use of botulinum toxin, and novel treatments such as tizanidine, intrathecal medications, and neurosurgical techniques. The contributors also review coordinated approaches to the treatment of spasticity and specific neurological diseases such as spinal cord injury, multiple sclerosis, stroke, cerebral palsy, and traumatic brain injury. Authoritative and cutting-edge, *Clinical Evaluation and Management of Spasticity* constitutes today's definitive clinical reference on spasticity, and provides a framework for all physicians and physical therapists to develop effective treatment plans for their patients

Título: Clinical evaluation and management of spasticity edited by David A. Gelber and Douglas R. Jeffery

Editorial: Totowa, N.J. Humana Press 2002

Descripción física: 1 online resource (x, 385 pages) illustrations

Mención de serie: Current clinical neurology

Bibliografía: Includes bibliographical references and index

Contenido: I Basic Concepts of Spasticity -- 1 Physiology and Pharmacology of Spasticity -- 2 Clinical Features of Spasticity and Principles of Treatment -- 3 Measurement of Spasticity -- II Treatment Modalities -- 4 Physical and Occupational Approaches -- 5 Orthotic Management -- 6 Electrical Stimulation -- 7 Baclofen -- 8 Tizanidine -- 9 Benzodiazepines -- 10 Dantrolene -- 11 Alternative Pharmacologic Therapies -- 12 Nerve Blocks -- 13 Botulinum Toxins -- 14 Intrathecal Medications -- 15 Orthopedic Interventions for the Management of Limb Deformities in Upper Motoneuron Syndromes -- 16 Neurosurgical Management -- III A Coordinated Approach to the Treatment

of Spasticity in Neurologic Diseases -- 17 Management of Spasticity in Children with Cerebral Palsy -- 18 The Evaluation and Treatment of Spasticity in Patients with Multiple Sclerosis -- 19 The Development and Management of Spasticity Following Traumatic Brain Injury -- 20 Spasticity in Spinal Cord Injury: A Clinician's Approach
