

The cloud security ecosystem : technical, legal, business and management issues /

Ko, Ryan,
editor
Choo, Raymond,
editor

Monografía

This book discusses cloud security topics from multi-disciplinary and international perspectives, aligning technical security implementations with the most recent developments in business, legal, and international environments. It presents the most current research on cloud security from a multi-disciplinary standpoint focusing on technical, legal, and business management issues involved in implementing effective cloud security, including case examples. Other topics include: cloud trust protocols; cryptographic deployment; mobile devices and BYOD security management; auditability and accountability; emergency and incident response; cloud forensics; cloud data governance; mitigation and liability of international cloud deployment; legal boundaries; risk management; cloud information security management plans; economics of cloud security; standardization efforts. --
