

Tiny giants

/

Animal films.

Nature films.

Material Proyectable

The producers of Life and Planet Earth share this spectacular ground-level view of the smallest wonders of the natural world. Unless you've been an ant or an earthworm in a previous life, you've never seen anything like this. Immerse yourself in a terrifically fascinating place, where small creatures face titanic battles to survive. Tiny Giants reveals the astonishing lives of the smallest of animals. Using the incredibly immersive power of specialist cameras, audiences are transported in a very intimate way into another world to experience the titanic battles these creatures face to survive
