Learn Microsoft Enterprise Mobility and Security Training About This Video Protect apps with comprehensive protection policies Allow employees to work securely from virtually any phone, tablet or PC In Detail Its one of todays most important mobility challenges: How do you empower employees to be productive, while still protecting the massive amounts of data moving through your organizations mobile environment? Microsoft Enterprise Mobility + Security (EMS) provides the mobile productivity your employees want and the data protection your company needs. Through our EMS Learning Path, learn how EMS provides the tools to achieve both, providing your organization maximum mobile productivity. By taking the EMS Learning Path, youll learn to leverage the features offered in EMS to enable your organization to: Allow admins to configure devices with policies and certificates that allow users to easily access email, Wi-Fi, apps, and other corporate resources Provide users with the convenience of single sign-on access to thousands of cloud and on-premises applications Maintain control over any data that moves through Outlook, Word, PowerPoint, Excel, and Skype for Business Enable users to share files securely. By taking this course, you will learn how to meet the challenges of enhancing the security and communications of your employees without interrupting workflow across users, devices, and apps. All the code files are placed at <https://github.com/PacktPublishing/Microsoft-Enterprise-Mobility-and-Security-Training> Downloading the example code for this course: You can download the example code files for all Packt video courses you have purchased from your account at <http://www.PacktPub.com> .
