1993

Handbook Electronic books Handbooks and manuals.

Monografía

LABFAX volumes are purpose-designed data reference books for practising scientists. Each book presents key information for a major subject in one place and so saves hours of searching. It does not simply collect together data which are already available in catalogues since these are often incomplete and can contain conflicting information. Rather, the authors and editors of each LABFAX volume have searched the original literature for the accurate data which they know the specialist needs

Título: Biochemistry labfax edited by J.A.A. Chambers and D. Rickwood

Editorial: Oxford BIOS Scientific Publishers Blackwell Scientific Publications San Diego, Calif. Distributed in the United States, its territories and dependencies, and Canada exclusively by Academic Press 1993

Descripción física: 1 online resource (361 pages)

Tipo Audiovisual: Biochemistry

Mención de serie: The Labfax series

Bibliografía: Includes bibliographical references and index at the end of each chapters

Contenido: Buffers, chelating agents and denaturants -- Radioisotopes in biochemistry -- Chromatographic fractionation media -- Electrophoresis of proteins and nucleic acids -- General centrifugation data -- Enzymology -- Hydrolytic enzymes -- Characteristics of selected proteins -- Glycoproteins and protein glycosylation -- Chemical and post-translational modification of proteins -- Nucleic acids and their components -- Lipids -- Carbohydrates and sugars -- Safety and the disposal of toxic and infectious materials -- Sources of further biochemical data -- Atomic weights and mathematical formulae

Restricciones de acceso: Use copy. Restrictions unspecified star. MiAaHDL

Detalles del sistema: Master and use copy. Digital master created according to Benchmark for Faithful Digital Reproductions of Monographs and Serials, Version 1. Digital Library Federation, December 2002. <http://purl.oclc.org/DLF/benchrepro0212> MiAaHDL

Lengua: English
