Título: Molecular and cellular interactions underlying higher brain functions proceedings of the 9th Meeting of the International Neurobiology Society, held at the Abbaye royale de Fontevrault (France), on September 1-4 1981 edited by J.-P. Changeux ... [et al.]. electronic resource]

Editorial: Amsterdam New York Elsevier Science Publishers 1983

Descripción física: 1 online resource (xvi, 483 p.) ill.

Variantes del título: Progress in Brain Research

Mención de serie: Progress in brain research v. 58 Progress in brain research Molecular and cellular interactions underlying higher brain functions

Nota general: Bibliographic Level Mode of Issuance: Monograph

Bibliografía: Includes bibliographies and index

Lengua: English

ISBN: 0-08-086183-0

Materia: Higher Nervous Activity- congresses Cell Communication- congresses Central Nervous System- anatomy & histology- congresses Central Nervous System- growth & development- congresses Higher nervous activity- Congresses Neural transmission- Congresses Cytoarchitectonics- Congresses Developmental neurobiology- Congresses Molecular neurobiology- Congresses Publication Formats Nervous System Physiological Processes Physiological Processes Cell Physiological Processes Mental Processes Nervous System Publication Characteristics Nervous System Physiological Phenomena Psychological Phenomena and Processes Anatomy Cell Physiological Phenomena Physiological Phenomena Musculoskeletal and Neural Physiological Phenomena Phenomena and Processes Psychiatry and Psychology Growth and Development Cell Communication Central Nervous System Higher Nervous Activity Congresses Human Anatomy & Physiology Health & Biological Sciences Neuroscience

Autores: Changeux, Jean-Pierre

Enlace a serie principal: Progress in brain research (CKB)954926958899 (DLC)2011233390 (OCoLC)61848547 1875-7855

Enlace a formato físico adicional: 0-444-80432-3
