Monografía

The field of neuroimaging has reached a watershed and critiques and emerging trends are raising foundational issues of methodology, measurement, and theory. Here, scholars reexamine these issues and explore controversies that have arisen in cognitive science, cognitive neuroscience, computer science, and signal processing

Título: Foundational issues in human brain mapping edited by Stephen José Hanson and Martin Bunzl

Editorial: ©2010

Editorial: Cambridge, Mass. MIT Press ©2010

Descripción física: 1 online resource (xii, 321 pages, 8 unnumbered pages of plates) illustrations (some color)

Tipo Audiovisual: NEUROSCIENCE/General COGNITIVE SCIENCES/General

Mención de serie: Bradford Books

Bibliografía: Includes bibliographical references and index

Contenido: A critique of functional localizers / Karl J. Friston [and others] -- Divide and conquer : a defense of functional localizers / Rebecca Saxe, Matthew Brett, and Nancy Kanwisher -- Commentary on Divide and conquer : a defense of functional localizers / Karl J. Friston and Rik N. Henson -- An exchange about localism / Martin Bunzl, Stephen José Hanson, and Russell A. Poldrack -- Multivariate pattern analysis of fMRI data : high-dimensional spaces for neural and cognitive representations / James V. Haxby -- Begging the question : the nonindependence error in fMRI data analysis / Edward Vul and Nancy Kanwisher -- On the proper role of nonindependent ROI analysis : a commentary on Vul and Kanwisher / Russell A. Poldrack and Jeanette A. Mumford -- On the advantages of not having to rely on multiple comparison corrections / Edward Vul and Nancy Kanwisher -- Confirmation, refutation, and the evidence of fMRI / Christopher Mole and Colin Klein Words and pictures in reports of fMRI research / Gilbert Harman -- Discovering how brains do things / Stephen José Hanson and Clark Glymour -- Resting-state brain connectivity / Bharat Biswall -- Subtraction and beyond : the logic of experimental designs for neuroimaging / Russell A. Poldrack -- Advancements in fMRI methods : what can they inform about the functional organization of the human ventral stream? / Kalanit Grill-Spector -- Intersubject

variability in fMRI data : causes, consequences, and related analysis strategies / Jean-Baptiste Poline [and others] --
Neuroimaging and inferential distance : the perils of pictures / Adina L. Roskies -- Brains and minds : on the
usefulness of localisation data to cognitive psychology / Richard Loosemore and Trevor Harley -- Neuroimaging as
a tool for functionally decomposing cognitive processes / William Bechtel and Richard C. Richardson -- What is
functional neuroimaging for? / Max Coltheart
