Monografía

This book follows and complements the previous volume *Biotechnology and International Law* (Hart 2006) bringing a specific focus on human rights. It is the result of a collaborative effort which brings together the contributions of a select group of experts from academia and from international organisations with the purpose of discussing the extent to which current activities in the field of biotechnology can be regulated by existing human rights principles and standards, and what gaps, if any, need to be identified and filled with new legislative initiatives. Instruments such as the UNESCO Dec
