Analítica

We present a brief description of one set of Cistaceae deposited in the herbarium of the Real Colegio Alfonso XII of San Lorenzo de El Escorial. All of them belong to A. J. Cavanilles herbarium. The historical importance of these sheets is increased due to the fact as among them 6 sheets are type materials (*Cistus cinereus* Cav., *Cistus dichotomus* Cav., *Cistus glaucus* Cav., *Cistus mollis* Cav., *Cistus serratus* Cav. and *Cistus violaceus* Cav.) and 3 were used for Willkomm & Lange (1861-1880) as reference in order to establish the species corology in the classic *Prodromus Florae Hispanicae*
