

Engaging archaeology [25 case studies in research practice /

Silliman, Stephen W. (1971-),
editor

Monografía

Bringing together 25 case studies from archaeological projects worldwide, *Engaging Archaeology* candidly explores personal experiences, successes, challenges, and even frustrations from established and senior archaeologists who share invaluable practical advice for students and early-career professionals engaged in planning and carrying out their own archaeological research. With engaging chapters, such as 'How Not to Write a PhD Thesis on Neolithic Italy' and 'Accidentally Digging Central America's Earliest Village', readers are transported to the desks, digs, and data-labs of the authors, learning the skills, tricks of the trade, and potential pit-falls of archaeological fieldwork and collections research. Case studies collectively span many regions, time periods, issues, methods, and materials. From the pre-Columbian Andes to Viking Age Iceland, North America to the Middle East, Medieval Ireland to remote north Australia, and Europe to Africa and India, *Engaging Archaeology* is packed with rich, first-hand source material. Unique and thoughtful, Stephen W. Silliman's guide is an essential course book for early-stage researchers, advanced undergraduates, and new graduate students, as well as those teaching and mentoring. It will also be insightful and enjoyable reading for veteran archaeologists
