Monografía

The product of a group of scholars who have been working on new directions in Historical Linguistics, this book is focused on questions of grammatical change, and the central issue of grammaticalization in Indo-European languages. Several studies examine particular problems in specific languages, but often with implications for the IE phylum as a whole. Given the historical scope of the data (over a period of four millennia) long range grammatical changes such as the development of gender differences, strategies of definiteness, the prepositional phrase, or of the syntax of the verbal diathesi
