Título: Introduction to Calculus and Analysis Recurso electrónico] by Richard Courant, Fritz John

Editorial: Berlin, Heidelberg Springer Berlin Heidelberg Imprint: Springer 2000

Descripción física: XXV, 556 p. 157 illus. online resource

Tipo Audiovisual: Analysis Global analysis (Mathematics) Mathematics

Mención de serie: Classics in Mathematics 1431-0821

Contenido: From the contents: Functions of Several Variables and Their Derivatives: Points and Points Sets in the Plane and in Space; Functions of Several Independent Variables; Continuity; The Partial Derivatives of a Function; The Differential of a Function and Its Geometrical Meaning... -- Vectors, Matrices, Linear Transformations: Operations with Vectors; Matrices and Linear Transformations; Determinants; Geometrical Interpretation of Determinants; Vector Notions in Analysis -- Developments and Applications of the Differential Calculus: Implicit Functions; Curves and Surfaces in Implicit Form; Systems of Functions, Transformations, and Mappings; Applications; ... -- Multiple Integrals: Areas in the Plane; Double Integrals; Integrals over Regions in three and more Dimensions; Space Differentiation. Mass and Density; Reduction of the Multiple Integral to Repeated Single Integrals; Transformation of Multiple Integrals; Improper Multiple Integrals; Geometrical Applications; Physical Applications; ... -.

ISBN: 9783642571497 978-3-642-57149-7
