

4M 2006 - Second International Conference on Multi-Material Micro Manufacture

Elsevier Science,
2006

Industrial; Materials Science

Conference papers and proceedings

Monografía

This work covers the latest state-of-the-art research results from leading European researchers in advanced micro technologies for batch processing of metals, polymers, and ceramics, and the development of new production platforms for micro systems-based products. These contributions are from leading authors at a platform endorsed and funded by the European Union R & D community, as well as leading universities, and independent research and corporate organizations. * Contains authoritative papers that reflect the latest developments in micro technologies and micro systems-based products

Título: 4M 2006 - Second International Conference on Multi-Material Micro Manufacture

Editorial: Elsevier Science 2006

Descripción física: 1 online resource

Contenido: Keynote Papers; Major FP6 Projects; Market Studies on 4M Technologies and Applications; Components: Fabrication and Assembly Technologies; Metrology: Inspection and Characterisation Methods; Novel Materials: Characterisation and Processing; Process Modelling and Simulation; Process Characterisation including Process Chains; Systems: Novel Product and System Designs

Copyright/Depósito Legal: 171131171 814473328 823137527 823857401 823927510 824117100 824169131 935262600 969038830

ISBN: 9780080466293 electronic bk.) 008046629X 1280728787 9781280728785

Materia: Microtechnology- Congresses Production engineering- Congresses Microtechnology Production engineering
