

An Industrial Building Converted into a Girls School in Australia [

Broderick, Eamon

OECD Publishing,
2003

Analítica

An industrial building in Perth, Western Australia, has been converted into a secondary school to suit the particular needs of girls with educational and social difficulties. The aim of the building project was to provide a small school for approximately 30 students that caters to the needs of adolescent girls who are unable to operate within the mainstream or independent school systems
