Monografía

This book presents work that addresses both historical and novel approaches to the study of genetic and environmental influences on behavior. Contributors to this volume use behavior genetics as a means for understanding the etiology of mental illness as well as normal development. They ask, What genes predispose a person to develop a specific personality trait? What about an inclination to a psychological disorder? How do environmental factors enhance or mute genetic factors? Do they regulate inherited individual differences in behavior and personality throughout a lifetime? This book explores the many connections between genes, personality, development, and psychopathology. It focuses on research influenced by Irving I. Gottesman, a pioneer in behavioral genetics research. As a mentor and a colleague, Gottesman has worked to examine the role of genes and environmental factors using both traditional and novel study designs and analytic methods. This stimulating volume, by colleagues who have helped shape the field of behavioral genetics, presents cutting-edge work that carries on his legacy. This volume should interest researchers, practitioners, and students alike. (PsycINFO Database Record (c) 2005 APA, all rights reserved)

Título: Behavior genetics principles perspectives in development, personality, and psychopathology edited by Lisabeth F. DiLalla

Edición: 1st ed

Editorial: Washington, DC American Psychological Association 2004

Descripción física: 1 online resource (xxi, 239 pages) illustrations

Variantes del título: Available from some providers with title PsycBOOKS

Mención de serie: Decade of behavior

Documento fuente: PsycBOOKS (EBSCO) EBSCO

Nota general: Proceedings of a festschrift conference held in honor of Irving I. Gottesman

Bibliografía: Includes bibliographical references and indexes

Contenido: Behavioral genetics : background, current research, and goals for the future / Lisabeth F. DiLalla -- Temperament as a liability factor for childhood behavioral disorders : the concept of liability / H. Hill Goldsmith, Kathryn S. Lemery, and Marilyn J. Essex -- The initiation of substance use in adolescence : a behavioral genetics perspective / Matt McGue and William G. Iacono -- Middle age, marriage, and health habits of America's greatest generation : twins as tools for causal analysis / Susan L. Trumbetta -- Genetic correlations as "Z" variables : evaluating personality-> psychopathology associations / David L. DiLalla and Gregory Carey -- Genetic influence on social attitudes : another challenge to psychology from behavior genetics / Thomas J. Bouchard Jr. [and others]. -- Bad luck and bad genes in depression / Anne Farmer -- Contributions of Danish registers to understanding psychopathology : thirty years of collaboration with Irving I. Gottesman / Aksel Bertelsen -- Longitudinal prediction of schizophrenia in a prospective high-risk study / L. Erlenmeyer-Kimling, Simone A. Roberts, and Donald Rock -- Genes and neurodevelopment in schizophrenia / Hans Moises [and others] -- Spinach and ice cream : why social science is so difficult / Eric Turkheimer -- Behavioral genomics : where molecular genetics is taking psychiatry and psychology / Peter McGuffin -- Getting the bugs into our genetic theories of schizophrenia / Daniel R. Hanson -- Postscript : Eyewitness to the maturation of behavioral genetics / Irving I. Gottesman
