Over the years, the field of sedimentology has become subdivided into various specialities. Two of the largest groups are those who study clastic rocks and those who study carbonates. There is little communication between the two: journals appear which are exclusively devoted to one or the other, and research conferences tend to be mutually exclusive. On the other hand, rocks themselves cannot be "pigeon-holed" in this way - the facies change from clastic to carbonate both laterally and through time. This volume stems from the editors' observations of such changes in the Gulf of Mexico a

**Título:** Carbonate-clastic transitions electronic resource] editors, Larry J. Doyle and Harry H. Roberts

**Editorial:** Amsterdam New York Elsevier 1988

**Descripción física:** 1 online resource (313 p.)

**Mención de serie:** Developments in sedimentology 42

**Nota general:** Description based upon print version of record

**Bibliografía:** Includes bibliographies

**Contenido:** Front Cover; Carbonate - Clastic Transitions; Copyright Page; Table of Contents; Preface; Chapter 1. Plate Tectonic Control of Global Patterns of Detrital and Carbonate Sedimentation; Chapter 2. Sedimentary Models of Siliciclastic Deposits and Coral Reef Interrelation; Chapter 3. Histories of Coexisting Reefs and Terrigenous Sediments: the Gulf of Elat (Red Sea), Java Sea, and Neogene Basin of the Negev, Israel; Chapter 4. Gulfs of Northern Red Sea: Depositional Settings of Distinct Siliciclastic-Carbonate Interfaces Chapter 5. Terrigenous and Carbonate Sedimentation in the Great Barrier Reef Province Chapter 6. Mixed Siliciclastic/Carbonate Sediments of the Northern Great Barrier Reef Province, Australia; Chapter 7. Infilling of Coastal Lagoons by Terrigenous Siliciclastic and Marine Carbonate Sediment: Vieques, Puerto Rico; Chapter 8. Carbonate Terrigenous Sedimentation on the North Puerto Rico Shelf; Chapter 9. Accumulation of Mixed Carbonate and Siliciclastic Muds on the Continental Shelf of Eastern Spain; Chapter 10. Carbonate to Siliciclastic Periplatform Sediments: Southwest Florida Chapter 11. Control of Terrigenous-Carbonate Facies Transitions by Baroclinic Coastal Currents

**Lengua:** English

**ISBN:** 1-281-78124-X 9786611781248 0-08-086956-4

**Materia:** Carbonate rocks Sedimentary rocks

**Autores:** Doyle, Larry J. Roberts, Harry H.

**Enlace a formato físico adicional:** 0-444-42904-2

**Punto acceso adicional serie-Título:** Developments in sedimentology 42
