

Enfoques políticos y normativos en el desarrollo y adopción de forma segura de los vehículos inteligentes.

Breves referencias al caso español [

2022

text (article)

Analítica

In the present research work the automotive industry is addressed, its recent evolution and the perspectives of development from the convergence of automot-tive technologies and those of information and communication. The different actions that are promoted and implemented at the national and international level in recent years to favor the adoption of smart vehicles are presented. The activity of governments is characterized in an environment of digital transfor-mation, specifying the peculiarities that it has in the case of smart vehicles
