Between Rational Calculation and Enforceable Behaviour This paper examines the turmoils economists and sociologists often find themselves while arguing over the ultimate promoter of human deeds. Both the pursuit of self-interested calculation or the abiding by rules are paths that call for conceptual reasoning. Such reasoning is quite uncommon among social scientists. Victor Banbergs book Rationality and Rules is a good example of said failure. Despite promoting a closer approach between both sciences (economics and sociology), it shows a unilateral treatment of this issue and leads the author to a reduction that prioritizes calculation as the ultimate impulse
