

Hace 50 años: acontecimientos y avances médicos en 1960 [

2009

text (article)

Analítica

The present paper is to commemorate a significant date for pediatricians in our community: It has been 50 years since the founding of our Scientific Society. Events in the 1960s in Zaragoza society are reminded, and some of the achievements in medicine at that time are described, for example, new drugs and the description of the amino acid sequence of insulin. Finally, the life and the work of two Nobel prizes awarded that year by the Swedish Academy are discussed briefly.
