

## La incorporación de plataformas virtuales a la enseñanza: una experiencia de formación on-line basada en competencias [

Universidad de Extremadura: Departamento de Ciencias de la Educación,  
2005

text (article)

Analítica

The process of exponential integration that the new technologies have in all the aspects, have caused and are causing a significant change in the teaching-learning process. We can include the increasing use of the educational platforms as way of formation to wide numbers of users, such as these whose geographical location are far to accede to a presencial formation, or these who, due to the lack of free time, prefer learning at home in their spare time. Our contribution is centered in the exhibition of experience of a model of formation based on competences that is developed with the VirtualProfre4 platform used in the Sevilles University. We will present /display the design of this model, how it has been developed and some reflections derived from its development within this platform of education
