

La influencia externa en las transiciones de la "tercera ola" en América Latina: Debates, definiciones y propuestas teóricas [

Programa Buenos Aires de Historia Política,
2013

text (article)

Analítica

The external or internal source of regime change was one of the most complex issues to clarify for the social sciences so that the influence of the international aspects was relegated. Political science made his mark at the initial course, but in the last decade, it turned its interest attracted by other agendas. In parallel, there was a growing production from other disciplines (History, International Relations and Sociology) that did not continued the dialogue with previous literature and proposed other viewpoints. The issue of national and international actors was configured as a problematic area that could not be effectively riff off because of a lack of empirical studies and the persistence of a methodological nationalism. Therefore, this article reviews critically the literature on the subject with the intention of identifying continuities and changes in studies on the role of international actors and factors
