Monografía

Ontological Engineering refers to the set of activities that concern the ontology development process, the ontology life cycle, the methods and methodologies for building ontologies, and the tool suites and languages that support them. During the last decade, increasing attention has been focused on ontologies and Ontological Engineering. Ontologies are now widely used in Knowledge Engineering, Artificial Intelligence and Computer Science; in applications related to knowledge management, natural language processing, e-commerce, intelligent integration information, information retrieval, integration of databases, b- informatics, and education; and in new emerging fields like the Semantic Web. Primary goals of this book are to acquaint students, researchers and developers of information systems with the basic concepts and major issues of Ontological Engineering, as well as to make ontologies more understandable to those computer science engineers that integrate ontologies into their information systems. We have paid special attention to the influence that ontologies have on the Semantic Web. Pointers to the Semantic Web appear in all the chapters, but specially in the chapter on ontology languages and tools

Título: Ontological engineering with examples from the areas of knowledge management, e-commerce and the semantic Web Asunción Gómez-Pérez, Mariano Fernández-López and Oscar Corcho

Edición: 1st ed. 2004

Editorial: London Springer [2004] 2004

Descripción física: 1 online resource (411 p.)

Mención de serie: Advanced Information and Knowledge Processing 1610-3947

Nota general: Description based upon print version of record

Bibliografía: Includes bibliographical references and index

Contenido: Theoretical Foundations of Ontologies -- Methodologies for Building and Evaluating Ontologies -- Tools for Building Ontologies -- Languages for Building Ontologies -- Most Well-Known Ontologies -- Ontology-based Applications -- Case Study: Ontologies for Institutional Memories -- Case Study: Ontologies and e-commerce -- Appendix -- References -- Glossary of Keywords

Lengua: English

ISBN: 1-280-18945-2 9786610189458 1-85233-840-7

Materia: Knowledge management Expert systems (Computer science) Semantic Web

Autores: Fernández-López, Mariano (1971-), author Corcho, Oscar (1976-), author

Enlace a formato físico adicional: 1-85233-551-3

Punto acceso adicional serie-Título: Advanced Information and Knowledge Processing 1610-3947
