Analítica

The purpose of this article is to analyze the different programming frameworks of European Funds, based on different Community legal regimes, in order to achieve complementary objectives among all of them. The monograph addresses the singularities of the 2014-2020 Multiannual Financial Framework, the Next Generation EU Instrument, through the additional allocation via REACT-EU resources such as the Recovery and Resilience Mechanism and, finally, the 2021-2027 Multiannual Financial Framework. Offering order and clarity, knowing the requirements to access the different funds and offering vehicles of public-private participation are the main objectives to be achieved. Likewise, a view from the Autonomous Community of Aragon is offered to each and every one of them
