

Abandono escolar en el modelo profesional técnico en Sonora: factores de riesgo y de protección [

2018

text (article)

Analítica

This study addresses the issue of school dropout, the main problem that currently occurs in the upper middle level in Mexico, in the technical professional model, the objective of this article is to analyze the risk and protection factors against the problem, in the family, school and social areas of the first semester youth of a CONALEP in Sonora. The methodology was mixed, quantitative and qualitative, the instruments were: a questionnaire of sociodemographic indicators administered to students and the technique of semi-structured interview applied to teachers. The information generated by the results contributes to the design and implementation of practices and strategies to prevent and reduce school drop-outs among the technical professional model youth
