

Acercamiento al campo de la Psicología Aeronáutica [

2019

text (article)

Analítica

The impact of psychology in the aeronautical sector is undeniable. This article presents an in-depth study that investigates the way in which the air sector has resorted to science that investigates behavioral motivations, and tries to make it possible to understand how Human Performance fits with the objectives they seek. promote and maintain safety through the study and intervention on the human element and the understanding of Human Factors in Aviation. It takes a tour of the definition of the field and the way in which it, from its beginnings, had an interest in human behavioral responses in flight conditions, as well as questions about the selection of people involved in the air operation and finally, the impact of this field in the Colombian context. The present text tries to locate how the aeronautical psychology has been defined, which is its object of study and conception of the subject within the same. Also, raise some of the limitations of the psychologist's work in this field
