text (article)

Analítica

This work is developed in the La Tasajera community, in the municipality of Colombia, Las Tunas, Cuba, with the aim of designing awareness, training and socio-cultural promotion actions that favor the intervention of the RENERT renewable energy project. The proposal is based on the existence of irregularities that limit the intervention of the project, as well as environmental problems that affect the community. To carry it out, it was necessary to use different methods and techniques that facilitated data collection and the active participation of the inhabitants in meeting the proposed objective. The intervention of the project in the community can contribute so that it has a positive impact on the solution of local problems, so a set of actions that correspond to implement it are made available to the community work group and project specialists. enrich it and adjust it, in a conscious and participatory way, in the face of the very high demands that the preservation of the environment imposes today
