

Acciones socioeducativas sobre sexualidad para la familia de infantes con parálisis cerebral en el Centro Internacional de Restauración Neurológica. [

2011

text (article)

Analítica

This research summary aims at proposing correctional actions addressed to mothers and fathers of children diagnosed with Cerebral Palsy who attended the clinic attention to the CIREN Cuban patients during May 2009 to February 2010 to receive the Multifactorial intensive rehabilitation program. A descriptive study of cross-section, with a qualitative perspective that led to the perception of parents about the sexuality of his daughters was made / I. It applied a survey and qualitative interview technique was used in depth for the study. The diagnosis proved that they exist gaps in knowledge in the field of sexuality from the role of mothers and fathers, limiting the knowledge on this topic permeated myths and prejudices. The information received is not enough on the issues of child sexuality and consider that sex education of girls / boys who have a disability may be necessary if the physical recovery is conditioned. While they express that society is not prepared to live with difference. The elaboration of socio-educational actions was based on the information obtained in the diagnostic process
