

Actualización en vacunas recomendadas en el medio laboral [

2018

text (article)

Analítica

Vaccines have been a great advance in the field of public health since they have reduced the occurrence and mortality of a large number of infectious diseases. Vaccination of the population should be carried out in a systematic manner, following the recommendations of the governments. In the workplace, vaccines are a fundamental weapon to prevent the spread of those workers exposed to biological risks. The continuous changes in vaccination calendars require a continuous training in the matter to the professionals who are in charge of the prescription and administration of the same
