Agent SocialMetric: herramienta de asistencia al docente para determinar el clima social y la estructura del aula [

2015

text (article)

Analítica

: Today many educational software using social networks, have emerged as computer programs made in order to cover the role of facilitators of the learning process. Seeking to deepen the relationship between teachers and students in the courtly context, we have developed a web tool called Agent SocialMetric (based on social networks and conversational agents, also known as chatbots) whose primary objective is to assist teachers, simplifying the analysis of the dynamics interactions between students. Teacher attendance is based on the agent providing the current status of the classroom, the prevailing social climate in the classroom both be in college and university with positive relationships and affective ties that are filed there. In this article we show the basis and motivations of the work, as well as a description of the methodology embedded in Agent SocialMetric and functionality of the virtual environment tool circumscribing the application in a real case study in the field of admission to the course university
