

Agroecología y alianzas urbano-rurales frente a la desposesión [I/II]. I. Retos, ausencias y excesos de la planificación espacial [

2019

text (article)

Analítica

Four contributions make up this CIUR Journal: In the first one Marian Simon and Jon Sanz explain that for those social movements engaged in food sovereignty, it is strategic to influence spatial planning instruments, as it would leverage the reorganization of the production and the consumption in the food system. Luis Alberto Bermejo and Fátima Cubas explain the conflicts generated by wilderness protection plans, which restrict traditional uses. The difficulties for grazing in those areas fragmented by the urban expansion in La Orotava (Tenerife) has been dealt with the nstitutional mediation for new management plans. From another perspective and looking at food struggles in urban peripheries in Lisbon (Portugal) Inés Morales reflects on the contradictions of urbanization plans and the strategies of food movements and the contribution of both to the current processes of 'planned dispossession' and gentrification. Finally, Marta Sánchez presents the strategies of the peasant communities of El Chaco (Argentina). Land use and planning in the Chaco region are subordinated to geopolitical and economic interests, as a consequence of the extractive matrix of the dominant model of development
