

Agroecología y alianzas urbano-rurales frente a la desposesión [II/II]. II. Flujos y redes alternativas en la reconstrucción de las relaciones campo ciudad [

2019

text (article)

Analítica

This is the second CIUR dedicated to the International Conference in Agroecology, OSALA, 2019. Pablo Saralegui and Mariagiulia Constanzo explain the potential of alternative agroecological consumption models in Madrid and the risk for them to contribute to gentrification phenomena. The need to organize collectively the politized consumption, which they mentioned in their paper, is as well analysed by Alberto Mataran, Fiorella Russo and Jose Lopez Medina, who present the case of four agroecological self-employment experiences in Granada, linked to their 'Ecomercado' (eco-market). These experiences constitute examples of the transition at small scale which rebuild bonds with the territory and recover spaces for participatory processes. If we turn the look from the city to the countryside, as Rufino Acosta-Naranjo, Laura Amores-Lemus and Alfonso de España-Rigo do, we observe how agroecology is mainly an urban phenomenon. The case presented by them, 'Activa Valverde', in Extremadura, allows to explore the role of universities in reverting the depopulation of rural areas in Spain. The experience of 'Ex-tiercol', which is as well in Extremadura region, and based on the collective work of rural youngsters, provides a complementary insight in the issue. Altogether, this issue of CIUR covers urban and rural initiatives which re-organize the flows of the food systems by rebuilding more solidarian relationships between the countryside and the city
