

Alfabetización digital, competencias mediáticas y Open Data [

2016

text (article)

Analítica

This paper seek to know the value and the importance attached by citizens to information obtained from Open Data; as well as the perception of the incorporation of these in pre-university studies and the factors affecting around topics before. The article based on a quantitative research, in which 1,126 surveys were applied to Internet users between 16 year old or more, resident in Spain (including the Canary Islands, Ceuta and Melilla), with a 95.5% confidence and $ee = 3.16\%$, with a random stratified sampling. The data shows us how there is a very low valuation in the study population about the Open Data; as well as the current need to promote digital literacy oriented learning and media literacy in these scenarios
