

Alteraciones del campo visual en pacientes esquizofrénicos: miradas desde la perspectiva psicoanalítica [

2015

text (article)

Analítica

The aim of this research is to describe and analyse a group of visual-perception disturbances told by a group of 7 schizophrenic patients spontaneously, in an ambulatory Mental Health Service. Firstly we are going to review some of many neurobiological researches that describe the visual perception-organization disturbances in schizophrenic patients and to give a casual hypothesis for this. Finally we suggest a psychoanalytic interpretation of this phenomenon
