

Análisis de las notas tomadas por los alumnos en una presentación inicial de límite de una función [

2017

text (article)

Analítica

In this article, we examined the notes taken by four classes of eleventh-grade during the first presentation of the notion of function limit. We analyzed the elements that the students had decided to write down and the aspects of the meaning of the concept represented in their notes. We detected important differences in the transcription of examples and verbal notes. These notes usually emphasized movements only in one variable or on the graphs of the functions. We conclude with some reflections about the potential influence of these notes in the student's learning of the concept
