Analítica

The present work analyzes the problem that our country has been dragging for many years and is of the normative hyperregulation with the serious inconveniences and costs that this entails. The study of Title VI of Law 39/2015, of October 1, on the common administrative procedure, in particular the principles of good regulation as a backbone that should inspire the process of regulatory development, is addressed. The creation and development of the Office of Coordination and Normative Quality is analyzed and some proposals are outlined to deepen in the improvement of quality of the norms
