

Análisis de la productividad de dos unidades lecheras del municipio Majibacoa, Las Tunas, Cuba [

2016

text (article)

Analítica

The research was carried out at the "Waldemar Díaz" and "Calixto Sur" Cooperative Production Units (UBPC) in Majibacoa municipality, in the province of Las Tunas, Cuba, with the objective of analyzing the main variables affecting milk production. The analysis of this research was carried out in the year 2015, in which the period from 2010 to 2012 is studied. The data collected grouped the variables related to productive and economic performance. Cows in milking / total cows), (total births / cows), (annual milk production / total cows) e (total income / total expenses), which were established by the impact measurement methodology the mathematical method used, showed that the UBPC Waldemar Díaz and within this "Los Campesinos" was the best productive performance in the period evaluated
