

# Análisis jurídico comparativo de la subasta electrónica inversa entre Guatemala, Perú y Ecuador [

2020

text (article)

Analítica

As part of the efforts of the Government of Guatemala to update and modernize the country, a new form of State Procurement was implemented. That is why the Reverse Electronic Auction was introduced, which is a new alternative to the way the contracting processes is carried out. One of the most distinctive characteristics of this new modality is that the majority of the process is carried out in a digital manner, through a web portal. After several years of coming into force, and since its creation, it has not met with the expectations. It is imperative to take into account that this form of State Procurement has already been previously used by different states. In the state of Peru, this modality is highly popular and represents substantial savings in the processes that have been carried out in this manner. In the state of Ecuador it can be said that it has also fulfilled the objectives for which it was implemented
