

As contribuições da civilização egípcia na literatura e na educação: primeiras relações históricas entre texto verbal e texto não verbal [

2017

text (article)

Analítica

The union between the verbal and nonverbal texts in a single work of art is one of the characteristics of literary structures of the Ancient Egypt civilization. Historical documents from that civilization are used to approach the topic. The focus of the research is the circumstantial paradigm of deciphering textual and visual signs. Relationships between verbal and nonverbal cues in one of the main works of art of that civilization are identified through an interpretive analysis. These relationships could be integrated into contemporary literature and education
