

Bases de datos bibliográficas de interés en enfermería en cardiología [

2014

text (article)

Analítica

The most important secondary sources of information are bibliographic databases, offered today on the Internet and some of them free available. The producers of these databases have worked in design, ergonomics and structure in order to show friendly and easy interfaces that provide satisfactory results to the researchers. The main domestic and international bibliographic databases of interest in Cardiology and Nursing are described in this article. Among them, we include IBECS, MEDES, IME, Enfispo, Cuiden, Cuidatge, Medline/PubMed, Web of Science, Scopus, CINAHL, Cochrane Library Plus, LILACS and BDENF
