

Burbujas inmobiliarias y planeamiento urbano en España: "una amistad peligrosa" [

2017

text (article)

Analítica

The history of our country in the last half century, has been characterized by the succession of different real estate boom periods that have a territorial expression supported by the type of planning prevailing in each of them. To stage this symbiotic relationship of adverse effects, dedicates this text occurs where a brief tour of the three periods of real estate explosion that, since the last years of the Franco regime, have been chaining culminating at last, at the turn of the millennium, which has proven to be the most prolonged, virulent and territorially predator of all of them because of the financial capillary that has infiltrated in the field of domestic, consequences that have affected dramatically the Spanish households economy, plunging into poverty to many population sectors
