2014

text (article)

Analítica

The aim of this article is to understand the tensions that existed between Chile and Great Britain in the mid-twentieth century (1947-1952), during which the Second World War left a new world order where Antarctic claims will be much more intense. This is where the role of the embassy is crucial to maintaining peaceful relations among nations and where the arguments are the primary providers of these good relations, therefore, the work of the Foreign Ministry and Ambassador Manuel Bianchi Gundián will be critical to avoid major conflicts and encourage in dialogue about possible solutions to the actual tensions
