

## Críticas epistemológicas y metodológicas a la concepción positivista en las ciencias sociales [

2009

text (article)

Analítica

In the following article appear the epistemological and methodological critics that have been elaborated against the positivism model from beginnings of Century XX. Beginning by the hermeneutic, the logical empiric, the quantum theory, the critical rationalism, more ahead the critical theory, the constructivism and the postmodernisms, is concluding with the paradigm of the complexity and the transdisciplines. We will see as each one of these paradigms has emphasized determined aspects of the reality (ontological) and the form to know it (gnoseology), until getting in the decade of 70 and 80 to propose visions that they integrated in the study of the society, the different levels and dimensions from the reality: the macro-micro, the objective-subjective, staticdynamic, the regularities-the uncertainties, the order-conflict and the holisticfragmentary, as one more a form adapted to explain and to include/understand the reality, that allowed to as much surpass the limitations of the hermeneutics as of the positivists
