Analítica

This article undertakes an exhaustive analyses, from top to bottom, of the famous book of Peter Singer Animal Liberation of 1975. From the perspective of moral philosophy, this article criticises the ideas about the treatment of animals, which are developed in that book. The article deliberates on the concept of specism, which Singer defines as a prejudice of mankind against other species, and provides arguments against his opinion on the fact that animals are subject to rights. The analyses that we have developed aims at refuting Singer's thesis by means of arguments founded on moral philosophy and economics. Rightly, the book of Singer criticises the fact that due to economic, health and national security reasons, we inflict a lacerating cruelty to animals. In our view, however, to use this fact as a basis to justify equality among animals, which includes man, is a fallacious argument that should be avoided
