Analítica

The technological advances of the last decades have dramatically transformed the lives of the people, their social actions are mediated by the Web 2.0, which forms an inseparable marriage with the Smartphone, whose daily use is already normalized. The work of Feixa is the result of an arduous research work that allows us to understand to the youth of the 21st century by means of a series of analogies and metaphors. The stories reflect an exquisite work of field with a language pretty self explanatory. This book becomes a very important contribution for all social scientists
