

De los tipos ideales a las realidades históricas. El fascismo italiano a la luz de la teoría ideacional del populismo [

2022

text (article)

Analítica

Fascism has been scarcely analysed in populism studies. Studies that have addressed both fascism and populism have lacked either a developed theoretical framework (in the case of fascism studies) or a minimally rich empirical content (in the case of populism studies). In this article we try to overcome these limitations by developing an analysis of the Italian fascist discourse, as articulated by its founder and leader, Benito Mussolini, on the basis of the ideational approach to populism. Our analysis identifies the core populist components of the Italian fascist discourse and shows the existence of shared patterns characterizing populist rhetoric in different political and historical junctures. In addition to that, our analysis provides us with insights that might be useful to interpret the characteristics of contemporary political actors connected, directly or in directly, to fascism. Finally, our analysis shows that historical studies continue to be crucial to test and refine contemporary political science theories
