text (article)

Analítica

The analysis and evaluation of the distribution of tourist infrastructure is an important element to understand how tourism from technical objects produces the geographical space. In Pirenópolis (GO), the elements of historical- architectural heritage and natural heritage make up the tourist offer, that need a set of infrastructure to subsidize tourism and boosting the development of this activity. This study intends analyze and evaluate the distribution of tourist infrastructure at the historical site of Pirenópolis (GO), comparing it with the location of tourist attractions in order to understand its contribution to the development of tourism. For this, diverse surveys of field for identification and register tourist of the infrastructure and tourist attractive at the urban area were carried through, based in this inventory were the constructed the map of tourist attractive and of the tourist infrastructure, for comparing e, thus, to subsidize the analyses and quarrels of the results. It can be concluded that the geographical distribution of tourist infrastructure in the area felled obeys standards by the various types listed, which do not favor the visitation and enjoyment of cultural heritage, as randomly distributed across the polygon
