

## Análisis multitemporal en ciudades medias con mapas de la percepción.: Albacete: 1993-2016 [

2018

text (article)

Analítica

Changes are evident in Spanish medium-sized cities over the last 25 years. Urbanism has changed its size, morphology and structure. At the same time, the important economic growth and technological development of Spain have transformed the way to connect and understand the urban atmosphere. These changes affect the object and the subject of study: city and citizens. Research has usually been centered on the first one, leaving to the background the perception of the city. The article examines the methodological possibilities of multitemporal studies with mental maps. A study of cognition geography about city of Albacete realized in 1993 is compared to another one carried out for this investigation. There are substantial changes in the number of elements perceived and the idea of the city that one has
